5. LOCATION OF CLAIMS:

Sections 26, 27, 34 and 35; Township 24 South; Range 11 East; North Temple Mountain, Emery County, Utah.

Schedule "A" and Schedule "B" attached hereto further identify the location and configuration of the claims.

6. ACCESS TO CLAIMS:

Access to the mining claims subject to this Plan of Operation will be via an well-established and well-traveled BLM maintained road through what is commonly referred to as North Temple Wash (see attached Schedule "A"). Either a 2x2 or 4x4 vehicle will be used to access the claims during the Plan of Operation.

No construction, reconstruction, or restoration of the North Temple Wash access road will be required in order to access the claims for the purpose of completing the work program to be conducted under this Plan of Operation.

7. NUMBER OF DISTURBED ACRES:

There will be no surface acres disturbed during the work program subject to this Plan of Operation.

8. DESCRIPTION OF OPERATIONS:

The work program to be conducted under this Plan of Operation includes soil geochemistry, underground mapping and sampling, and metallurgical studies. No surface acres will be disturbed during said work program under this Plan of Operation.

No camping or storage facilities will be required during this Plan of Operation, and all work shall be conducted in a miner-like manner and in compliance with all federal and state safety rules and regulations.

9. PERIOD OF PLAN OF OPERATION:

Approximately August 15, 1991 - August 30, 1991.

10. ENVIRONMENTAL PROTECTION MEASURES:

The work to be performed under this Plan of Operation will not cause any unnecessary or undue degradation to the surface of the public lands or the environment, and no reclamation will be required under this Plan of Operation.

Access to the mining claims subject to this Plan of Operation will be by a well-established and well-traveled BLM maintained road. There will be no unnecessary or undue degradation of to public lands as a result of access during the Plan of Operation.

11. EXTENDED PERIODS OF NON-OPERATION

The lode mining claims that are subject to this Plan of Operation have recently been designated as an Area of Critical Environmental Concern ("ACEC") due to their "Cultural Resources". This Plan of Operation provides solely for the work to complete federal annual work requirements for the assessment year ending August 31, 1991.

Therefore, there will have a period (less than 1-year in duration) of non-operation, which period could be considered "extended".

The mining claims and the surface subject to this Plan of Operation will be left in the exact condition as was encountered at the commencement of the work program described above. Any and all portals located on the subject mining claims that may be entered during the Plan of Operation will be sufficiently closed to entry after all work under this Plan of Operation has ceased. Warning signs will posted on the claims and on the portals.

It should be noted that the subject claims and portals thereon have been subject to on-going vandalism by recreationalists and other non-authorized visitors that have been directed to the property by various tourist publications. This problem has been reported by the Owner to the Director of the BLM in Washington, D.C. and the Utah State Director.

12: CULTURAL RESOURCES & PALEONTOLOGICAL STATEMENT:

I am aware that the Temple Mountain Mining District has recently been designated as an Area of Critical Environmental Concern ("ACEC") for its "Cultural Resources".

The Cultural Resources protected under the ACEC designation are the very same resources/assets developed and owed by my family and myself during our 50-year stewardship of the claims. Therefore, my activities under this Plan of Operation will have no adverse impact on the Cultural Resources.

Further, I will not knowingly disturb, alter, injure, or destroy any scientifically important paleontological remains or any historical or archaeological site, structure, building or object on public lands, and shall further immediately bring to the attention of the authorized officer of the BLM any cultural and/or paleontological resources that may be encountered during the Plan of Operation, and will leave same intact.
